

CG AIR

THERAPEUTIC AIR CUSHION.

CG AIR is an innovative air cushion, designed to respond to problems of hygiene, upkeep, posture and stability, all the while preserving an exceptional control of air-flow.

The CG AIR provides optimal relief from pressure on skin and muscles thanks to its comfort, quality, durability and stability.

Reliable, recognised and appreciated.

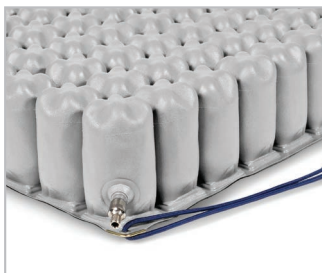

A winner of the 2019 American Mobility Product Awards.

› Technical characteristics

Material	medical quality PVC: - better air retention - hypoallergenic - antifungal
Maximum user weight	no limit
3 fire retardant covers to choose from (Satisfying CAL 117-2013 standards)	- standard - 3D net - incontinence
Inflation	- manual pump provided - available with the choice of one or two valves
Cell heights	choice of 50, 75 or 100 mm
Cushion dimension	from 255 to 610 mm (width or depth)

› Stability

The use of medical quality PVC offers an increased stability for an ideal posture.

› Pressure management

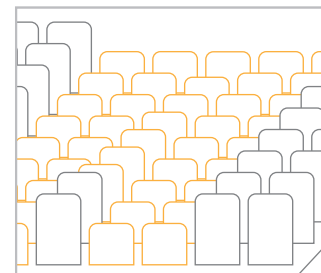

innovative design providing a fluid and controlled air movement which stimulates the user's blood circulation.

› Easy upkeep

Does not retain odours, easy to clean, and allows no loss of air. Machine washable and may be disinfected in autoclave.

› Bespoke

Using a made-to-measure ordering matrix, we can obtain different cell heights, thus modifying the form of the compartments.
